## Our Vision

Safe communities safeguard futures.

## Our Mission

Creating brave spaces that empower young voices and inspire society to develop safer communities.

**A reporting tool for young people,  
to keep them safe in all contexts...**

## What is The Student Voice?

**Currently, most electronic safeguarding systems focus on listening to adults in the community. However, as Carlene Firmin (2017) suggests, students may not readily share such information with adults.**

The Student Voice is an interactive and child-friendly reporting tool for young people that encompasses all aspects of their wellbeing, and all of the contexts they spend time in.

Complimenting adult reporting systems, schools and DSLs are able to provide immense wrap around safeguarding provision; supporting the individual, whilst using the contextual data to implement targeted interventions, and prevent future harm occurring in those spaces. It is helping DSLs tackle the full range of issues, from child-on-child abuse issues, to mental health, bullying and online safety.

**“Students are more confident using it than questionnaires”**

DSL, Orchard Primary, Oldham

## Why do schools use The Student Voice?

- ✓ Engages young people with its **child-friendly, visual and intuitive** features.
- ✓ Covers **all contexts** young people spend time in (home, school & local community).
- ✓ Provides the context, not just the incident, so you can support the individual and **prevent future harm** from occurring in those spaces.
- ✓ Has engaged young people with issues that were previously reflected through their behaviour, which staff have been able to provide further support for.
- ✓ Covers **the full range of issues** from sexual harassment to mental health, bullying, home life, and online safety.
- ✓ **Bridges any** student-teacher **communication gaps** with a comfortable experience.

Access on any device, at any time

# What our schools say...

"We have been struggling to engage with a particular student for quite a few months. We are very pleased to say that within the first few days, the student used the system to articulate their worries and what support they feel could help them...The Student Voice has **provided an invaluable safe space** for our students to feel comfortable to communicate with us."

Amy E, DSL Moor End Academy

"This is a fantastic resource – child-friendly and simple to use. It covers in-school, surrounding areas and home...It creates a **proactive approach to reporting and understands the barriers** children face in trusting the reporting system."

Ann-Marie Christian, Safeguarding and Child Protection Expert and Judge of the Teach Awards 2022

## DSL Dashboard

Use local authority guidance to rank submissions, so you are not working in isolation.

View individual cases and create action points to follow up with

Download cases for CPOMS or My Concern

Record positive submissions and address and prioritise other cases

Demonstrate effectiveness of interventions to stakeholders through reporting

“The first step to protecting students is listening to their experiences of where they feel safe and unsafe at school. The Student Voice tool supports schools to **put Contextual Safeguarding into action.**”

**Dr Jenny Lloyd, Senior Research Fellow, Contextual Safeguarding Network at Durham University**
