

Enable students to report their experiences across every context

Supporting your Inspection

- > Identify pupils who **need support**
- > **Engage** with **non-attendance** pupils
- > Address **behaviour, bullying or harassment**
- > Ensure students feel **heard and safe**
- > Implement **effective** safeguarding **systems** for pupil voice
- > Identify **locations of harm** and contextual safeguarding issues

Innovating for Ofsted

“Leaders also introduced an online system for pupils to share their worries with staff. Pupils are encouraged to share any concerns they have about returning to school. **Pupils value this** and said that **teachers respond to their concerns quickly.**”

This has helped to **reduce some pupils’ anxieties** about returning to school.”

Improving Culture

Assistant Head and DSL at Kineton High School

“What has been really successful is students being able to engage, make suggestions and **feel included** as part of our school.

It ticks the contextual safeguarding box whether its issues inside or outside of school, and allows us to **quickly intervene with situations**, whether it’s something that has occurred online or on our buses.

Students are starting to **share things we wouldn’t have heard of**, or what we would have only felt the impact of through their behaviour in school. Now they feel like they have a place where they can vent their frustrations...**it allows us to react faster and more effectively** to our responsibilities around addressing peer-on-peer issues”

The Student Voice Supporting your Inspection

Community Impact

Head Teacher at Haberdashers’ Monmouth

“The Student Voice has been a fantastic addition to our student portal, allowing our students to **flag up any issues in their infancy**. Our approach to contextual safeguarding has really improved and we have been able to pass on any **wider community concerns** to the neighbouring school in our town. It’s really given the girls the **freedom to talk** to us about any issues they have, as it uses their **preferred medium of communication** – tech – and is anonymous. Thanks to their valuable insights, we’ve improved our lunch processes, adapted some structures, dealt with isolated personal incidents before they developed, and been able to share knowledge with others in our **local community**, to help keep all our young people safe.

I would highly recommend The Student Voice. It really is an impressive piece of software and the **students love it as it is extremely user friendly.**”

Removing Barriers

DSL at Moor End Academy

“We have been struggling to **engage with a particular student for quite a few months**. We launched The Student Voice this week, promoting it to our students as a safe space for them to voice anything that is concerning them and that we want to hear from them.

We are very pleased to say that within the first few days, the student used the system to **articulate their worries and what support** could help them. The Student Voice has provided an invaluable safe space for our students to feel comfortable to communicate with us.”
